

NX501E

2-DIN DVD MULTIMEDIA STATION WITH 6.2-inch TOUCH PANEL & BUILT-IN NAVIGATION

NZ501E

DVD MULTIMEDIA STATION WITH 7-inch TOUCH PANEL & BUILT-IN NAVIGATION

Navigation and entertainment come together at your fingertips

Interactive GUI with flick operation

The NX501E/NZ501E's touch screen GUI (Graphical User Interface) supports flick operation, so you can quickly scroll to another menu page. Feature icons are animated for an enhanced appearance, and they can be dragged and dropped into different positions to customise the screen.

Made for iPod® and Made for iPhone®

Made for iPod and Made for iPhone certified so you can enjoy the convenience of iPod/iPhone ABC Search to quickly access tunes, and simple control mode to allow operation using the iPod/iPhone controls. Album Artwork is displayed to visually enhance the interactivity.

* For audio playback, please use the USB cable provided with your iPod / iPhone.
* For video playback, an optional CCA748 cable is required.
* Please see our website for details of compatible iPod / iPhone models.

Parrot Bluetooth® module

Parrot Bluetooth offers extremely comprehensive compatibility with a variety of mobile phones. Enjoy hands-free communication using the built-in microphone and Phonebook access. Play music stored on your mobile phone with Bluetooth audio streaming. A wide range of protocols are supported: HFP/HSP/A2DP/AVRCP/PBAP/OPP. Firmware updates are possible via USB connection.

* Dependent on mobile phone.
* Please see our website for details of compatible Bluetooth mobile phones.

Easy navigation map updates

It is easy to keep the navigation system up-to-date. Simply download new map data from Clarion's dedicated portal site, store them on a microSD card and insert it into the NX501E/NZ501E via the front card slot. Unpleasant surprises are now avoided as navigation maps will correspond to the real world.

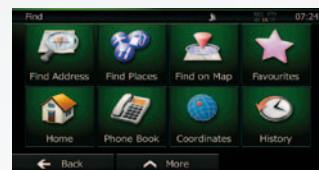

Latest Map Guarantee (LMG):

The user can download the latest map data from our dedicated portal site. The first download is free of charge, and possible within 30 calendar days after the unit receives the first GPS signals. Thanks to this, the user has the guarantee to be navigated with the very latest map data release.

Notice: In order to let the data download possible the unit must first be registered at our portal site. The availability of the latest data depends on their release by the map data provider. Thus there is no guarantee from Clarion that the data available on the portal site are always fully updated.

Navigate your way with an enhanced sense of reality

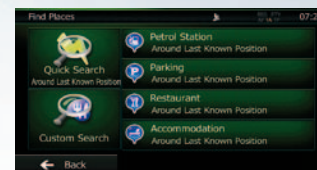

Smart, simple and direct control on touch-panel display

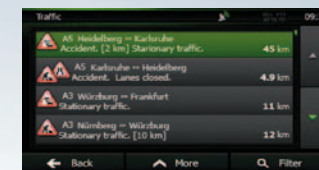

Text to speech

Rich POI database

RDS-TMC traffic information

Sophisticated and efficient navigation graphics

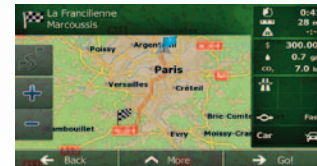

Roads, junctions and bridges with elevations

Signpost information

Elevation modelling and 3D rendering for a realistic view

Topographical view

MP3/WMA Bluetooth

VX401E

2-DIN DVD MULTIMEDIA STATION WITH
6.2-inch TOUCH PANEL CONTROL

Touch screen controlled GUI

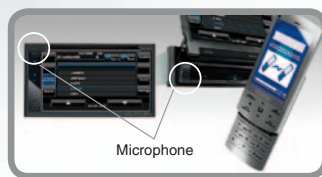

The GUI (Graphical User Interface) displays large, highly visible icons that are easily recognisable at a glance. And thanks to the touch screen display, accessing each function is as simple as placing your finger on the corresponding icon.

Built-in Bluetooth® hands-free

With a Bluetooth compatible head set, you can wirelessly connect your Bluetooth capable mobile phone to the main unit in order to listen to calls through your car's audio system. HFP/OPP/A2DP/AVRCP protocols are supported. The mobile phone's contact list can be synchronised with the main unit*. You can then dial the required phone number directly from the multimedia station.

* Dependent on mobile phone.
* Please see our website for details of compatible Bluetooth mobile phones.

iPod® and iPhone® connectivity for seamless enjoyment

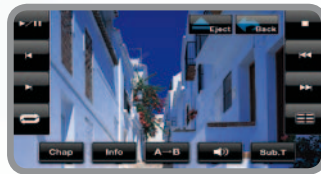

You can connect your iPod or iPhone to the main unit's USB connector and access your music and videos. Your device can be operated from the main unit's control panel, with sound audible through the car's speaker system. The USB connector also supports playback of MP3 and WMA files, as well as DivX files.

* For audio playback, please use the USB cable provided with your iPod / iPhone.
* For video playback, an optional CCA748 cable is required.
* Please see our website for details of compatible iPod / iPhone models.

WVGA digital LCD display

VX401E/VZ401E are both equipped with a high-resolution WVGA LCD screen. This high resolution capability provides more comfortable viewing of your favourite videos.

DivX® compatible

DivX is a common media language that delivers a pure digital experience. DivX enriched video files deliver superior video quality and enable storage of more information on a single disc or a USB memory. DivX compatibility in the source unit means that DivX encoded files transcoded on your PC can be viewed and enjoyed in your car, just like you'd be able to at home.

For more detailed information concerning installation possibilities, please refer to the CIP (Clarion Installer Programme) on page 15

Add visual excellence to your mobile communication

24-bit D/A converter for superb sound reproduction

The digital realm is made up of unnaturally square sound waves, as opposed to the smoothly undulating sound waves characteristic of the real-world environment. This is why Clarion's 24-bit D/A (Digital-to-Analogue) converter over-samples the digital signal to recreate the natural nuances and expressions lost during the sound reproduction process.

6-channel audio pre-out

Equipped with 2 channels for Front (L/R), 2 channels for Rear (L/R) and 2 channels for subwoofers, the full set of RCA line outputs allows integration into a wide range of potential systems, and is ready to support future system expansions.

DIGITAL TV TUNER

Easily upgrade your system for digital TV reception

DTX501E

DVB-T DIGITAL TV TUNER

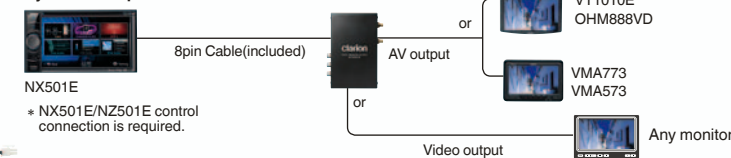

For NX501E, NZ501E, VX401E, VZ401E, NX700E, MAX688RBT, VRX888RBT, NX509E, VZ409E, VZ509E, VZ709E & VX709E

- High performance MPEG-2 digital diversity tuner
- Remote control included
- Intelligent touch screen operation with NX501E & NZ501E
- 2 active antennas included
- 1 RCA Audio Video output (2ch stereo audio, 1ch video)

- Compatibility with PAL
- Fully compliant with DVB-T standards
- Auto/Manual channel search, Auto save
- Favourite channel list editing Supports EPG, Teletext, Subtitles
- Frequency Range: 177,5-226,5 MHz/474-858 MHz
- Dimensions: 148,5 (L) x 76,8 (W) x 30,3 (H) mm
